

Dear FCC, Please reject the National Association of Broadcasters petition 04-160. I subscribe to Satellite radio because of the variety services and the quality of sound which isn't found anywhere else on the airwaves. Satellite radio provides a service that other radio stations are evidently unwilling or unable to provide. The public benefits from satellite radio and I don't think radio station owners should petition the government to enact laws to diminish satellite radio's services in an attempt bring satellite radio down to their level. It seems to me what the NAB is trying to do violates the First Admendment. I want satellite radio to grow!!

Sincerely, George Flynn
